### Brief Note on the project proposed under CSR Fund

Mysuru Territorial division consists of Moist deciduous, dry deciduous & scrubs type of Forests where forest fire is likely to happen during summer. Chamundi State Forest is situated in Mysuru district head quarter which is acting as lungs of Mysuru city. Chamundeshwari Temple is situated in the top the Chamundi hill is the place of religious pilgrimage as well as trekking trail to citizens. Human interference is higher at this place which is also the reason for Forest fire. T.Narasipura range is the place with the low rainfall receiving area forest fire is likely to happen at this area. Nanjungud, Mysuru, Saragur & H.D.Kote ranges are sharing boundaries with Tiger reserves, which is also one of the causes for spreading of Forest fire. **Quick Response vehicles are very much necessary to reach the spot of Forest Fire occurred in-time in order to put off the Forest fire.**
